ORS GROUP delivers the world’s first Smart Government software solution based on A.I., Machine Learning and Big Data Analytics

Milan, September 30 2017

ORS Srl, the brain farm of ORS GROUP, has delivered the world’s first software solution to monitor and optimize extended Government activities and resources thanks to applied Artificial Intelligence (A.I.), Machine Learning (ML) and Big Data Analytics (BDA) algorithms.

ORS SmartGraphs™ technology was deployed for improving data analytics and business intelligence user experience in very complex organizations, like public institutions.
